## Illuminate blockchain transactions

Recsolution is a leading provider of blockchain forensics services, specializing in tracking digital currencies like Bitcoin and Ethereum in investigations. Our partnerships with exchanges and leading vendors of blockchain forensics tools, combined with our expertise in on-chain and off-chain analytics, enable us to provide comprehensive investigative services.

## How It Works

### I Investigations

Utilizing our full resources and connections, we employ advanced blockchain analysis to trace the movement of lost crypto. We meticulously monitor and track suspicious activities, while taking on cases with a high likelihood of success.

### II Collection Process

Following blockchain analysis, we dive deeper using investigative techniques like data mining, network analysis, and collaboration with experts. We pursue legal avenues if needed while keeping clients informed at every step for a thorough and effective recovery process.

### III Get your money back

Following successful recovery, we securely transfer your funds back to you following international recovery protocols instated, providing confirmation and ongoing support to

enhance your security measures. Your satisfaction and peace of mind is our top priority.
