### EDUCATION CENTER

## Learn From Market Experts

Discover everything you need to know about cryptocurrency trading, from fundamentals to advanced strategies.

### About Bitcoin

Bitcoin (BTC) is a decentralized digital currency that operates without a central authority. Transactions are verified by network nodes through cryptography and recorded on a public distributed ledger called a blockchain. Created in 2008 by an unknown person or group using the name Satoshi Nakamoto, Bitcoin pioneered the concept of cryptocurrencies.

**RISK WARNING:** The Financial Products offered by the company include Contracts for Difference ('CFDs') and other complex financial products. Trading CFDs carries a high level of risk since leverage can work both to your advantage and disadvantage. As a result, CFDs may not be suitable for all investors because it is possible to lose all of your invested capital. You should never invest money that you cannot afford to lose. Before trading in the complex financial products offered, please ensure you understand the risks involved.
