Investment Products

Highly profitable products and services

Real Estate

Real estate is a \$217 trillion-dollar market making up almost 60% of all global wealth. It's the largest source of wealth, yet it is illiquid for 99% of the world today. In the past, you only had access to real estate if you were rich or had rich friends—meaning that most people weren't able to benefit from the passive income and capital appreciation it provides.

Gold

Commonly seen as a great store of wealth, this precious metal is also known as a reliable safe-haven asset. With a rich history amongst almost all global cultures, gold remains a highly popular investment. Although it has multiple uses, its primary function is typically to hedge against inflation in an often volatile futures market, as well as to diversify existing Precious Metals.

Cryptocurrency

Bitcoin mining is the process of creating new bitcoin by solving a computational puzzle. Bitcoin mining is necessary to maintain the ledger of transaction in which bitcoin is based. Miners have become very sophisticated over the last few years. Smartroxiq have through the years been part of the bitcoin mining sector. We have a pool of professional miners.

Oil and Gas

Surprising as it might be, anyone can invest in the oil market to make a profit. Indeed, the development of online trading platforms has allowed individuals to use their savings to speculate on rising or falling oil prices. To this end, simply choose your method of trading between the CFDs offered by Forex brokers, which are specifically designed for beginners.

Forex

Forex trading covers about 5trillion dollars daily by just the act of trading foreign currencies and precious assets. It comes with a lot of strategies . Smartroxiq has successfully secured 0.04% of the daily forex revenue by effective use of Technical and fundamental Analysis, Fibonacci etc. This serves as a way of generating revenue for investors.

Medical Cannabis

For many years we have been working conscientiously and with the most diverse technologies and means. We have constantly successfully completed our projects. We believe that the full benefits and potential of cannabis as a medical therapy are within our reach only through supply chain transparency, an engaged and active network of cannabis users.
