**CAPITAL**  
generation

We strongly recommend reviewing Capital Generation's policy. All investments carry risk and potential losses. Remember that diversification

helps spread risks but does not guarantee capital preservation or profits in a declining market. You may choose to assess the situation independently or consult with independent experts. There is always a risk of loss when investing in securities or other financial instruments. Before investing, traders should carefully assess their investment goals and risks. Capital Generation is not responsible for the trading decisions of investors.
