INSTITUTIONAL GRADE SOLUTIONS

A Complete Suite of Private Banking Services

Purpose-built for high-net-worth individuals, family offices, and corporate treasuries. Every capability is designed to meet the exacting standards of regulated institutional finance while delivering the speed and flexibility of modern digital infrastructure.

Segregated Custody Accounts

Maintain full ownership of fiat and digital assets in individually segregated, auditable custody accounts. Real-time balance verification, multi-layer authorization, and transparent reserve attestation.

Atomic Settlement Engine

Execute currency conversions at live interbank mid-market rates with sub-second finality. No hidden spreads, no settlement delays — atomic delivery-versus-payment across all supported pairs.

Global Capital Movement

Transfer value across 45+ jurisdictions via SWIFT, SEPA, Faster Payments, and leading Layer-1 blockchain networks. Automated sanctions screening and full audit trails on every transaction.

Regulatory & Compliance Framework

Operate with confidence under a comprehensive compliance architecture. Ongoing transaction monitoring, tiered KYC/KYB verification, and adherence to the latest AML/CFT directives across all operating regions.

Dedicated Relationship Management

Access a named relationship manager and priority support desk. Receive tailored advisory on portfolio structuring, treasury management, and complex multi-jurisdictional transactions.

Enterprise-Grade Architecture

Built on a globally distributed, fault-tolerant infrastructure delivering a 99.99% uptime SLA. HSM-backed key management, encrypted data stores, immutable audit logs, and continuous penetration testing.

SECURITY & TRUST

Institutional-Grade Protection for Every Layer of Your Wealth

Our security architecture mirrors the standards of Tier-1 global banks. Multi-layered defense, independent third-party audits, and a dedicated Security Operations Center ensure your assets and data remain protected around the clock.

- 🛡️ AES-256 encryption at rest and TLS 1.3 in transit, with all cryptographic keys managed exclusively within FIPS 140-2 Level 3 certified hardware security modules (HSM)
- 🛡️ Digital assets secured in MPC signature, air-gapped cold storage distributed across geographically redundant Tier-IV data centers
- 🛡️ Continuous threat monitoring by a 24/7 SOC Security Operations Center with real-time anomaly detection, behavioral biometrics, and automated incident response
- 🛡️ Independently audited for SOC 2 Type II, PCI-DSS Level 1, ISO 27001, and GDPR compliance. Full adherence to FATF Travel Rule and AML 5th & 6th EU Directives

Elevate Your Financial Operations

Join a growing network of discerning clients who trust our platform for custody, settlement, and cross-border capital movement. Digital onboarding takes minutes. No minimum balance required. Dedicated support from day one.
